CAREER PROFILE

OCT 2016 - CURRENT

Assistant Consultant – Senior Developer

Tata Consultancy Services | Melbourne, Australia

This is my second onsite role, as a senior developer in AGL digital transformation team I got opportunity to explore new front-end and back-end technologies. Currently we are concentrating on AGL One Minute Move. One Minute Move initiative is to deliver a new online experience flow for customers moving home, which caters for both move in and move out customers. The web application we started with Angular 2 and then upgraded to Angular 4. We are targeting 100% code coverage in this project by doing unit testing and end-to-end testing.

JAN 2015 - JUL 2016

Assistant Consultant - Solution Architect

Tata Consultancy Services | Riyadh, Saudi Arabia

The role as solution architect at onsite TCS presented with opportunities to attain in depth knowledge in hybrid app creation, security risks in hybrid applications and mitigate the security risks. Responsibilities also included making contribution application architecture, conducting discussion with all stakeholders, provide up to date status for all stakeholders, and provide technical support to offshore team. The main challenges I faced in this project was security risks in Hybrid applications. I developed some Cordova libraries for binary protection, jail break/routed detection, etc. to mitigate all security risks.

MAY 2015 - JAN 2016

Assistant Consultant - Tech Lead

Tata Consultancy Services | Kochi, Kerala

In this project I played a tech lead role of an offshore team, the project is a hybrid app implementation of TCS BaNCS Digital suite for leading bank in United States. The key responsibilities in this project is to understand complete requirements of hybrid application, provide world class solution and implement, test the application. We implemented hybrid mobile application for iOS and Android for all form factors. This application consists of several modules such as Funds transfer, Bill Payments, Person-to-Person transfer.

MAY 2013 - APR 2015

IT Analyst - Tech Lead

Tata Consultancy Services | Kochi, Kerala

As a tech lead role of a 10-member project I invested more time in attaining in-depth knowledge in various front-end technologies available in technology market. TCS BaNCS Digital suites is an enterprise wide solution that enables bank to give customers the flexibility and convenience of managing their finances anywhere. The solution is easily deployable and scalable and caters to retail and corporate banking (focused on small and medium businesses (SMBs)). To make a world class banking solutions, for TCS BaNCS Digital suites we did lot of research on various (Backbone.js, ember.js and AngularJs) front-end frameworks to pic most suitable framework for the product. Finally, we decided to go with AngularJs as JavaScript framework for front-end by considering its future, community, reusability, and modularity. The TCS BaNCS Digital suites consist of both Mobile and Web application and targeting all available form factors. Mobile application is a hybrid mobile application for iOS and Android.
